

Alpha-Slips™

Compact Disc Dividers

STARTER PACK

Alpha-Slips Inc.
P.O. Box 59078
1559 Alta-Vista Drive
Ottawa ON K1G 5T7

Order Centre and Pricing Information:
www.alphaslips.com

The Alpha-Slips Disc Divider System is comprised of this **Starter Pack**, **Theme Slips**, **Artist Slips**, and **rules**, which allow you to organize music, work and entertainment discs in a manner that best suits your own unique requirements. Alpha-Slips are designed for use with shelf-type compact disc (CD) holders (wide or narrow).

The **Starter Pack** organizes your CD collection from A-Z and separates "Soundtracks" and "Various Artists" into their own sections. Once this stage is complete, there are hundreds of options to further subdivide these sections using *Theme Slips* and *Artist Slips*.

Theme Slips allow you to:

- organize music by genre (as opposed to alphabetically);
- create mini-sections within your larger collection (i.e. create a small "Classical," "Rap" or "Ska" section within your larger "Pop/Rock" collection);
- group titles that do not lend well to alphabetization (i.e. "Dance/Party," "Relaxation," "Self-Improvement," etc.);
- organize DVDs ("Drama," "Comedy," etc.);
- organize work CDs (i.e. "Return to Client," "Clip Art," etc.); and
- organize CDs that you burn yourself.

Artist Slips group larger numbers of artist CDs into their own sections, making both artist and letter categories smaller and easier to access. There are hundreds of all-time best-selling artists and bands to choose from. Each Artist Slip contains either a discography or biographical notes* on the artist, and indicates how the artist is filed according to the music industry.

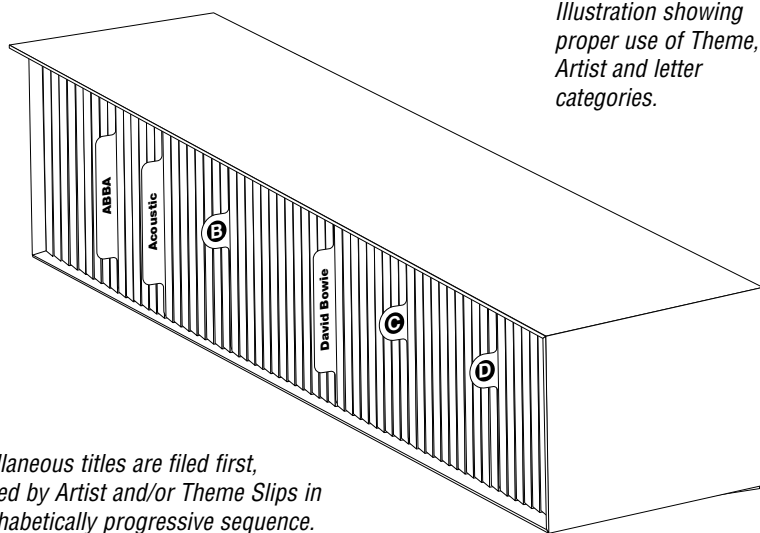

Illustration showing proper use of Theme, Artist and letter categories.

Miscellaneous titles are filed first, followed by Artist and/or Theme Slips in an alphabetically progressive sequence.

Help Create New Slip Titles

We want your suggestions for new Artist Slips, Theme Slips, DVD Slips and Computer Alpha-Slips. Go to www.alphaslips.com and register your suggestions. When enough requests are received to justify production, you will be notified by e-mail that the slip is available and being shipped.

The Artist Slip category is constantly growing, reflecting artist discography rather than popularity. As a general rule, Artist Slips are created for artists with seven or more highly successful releases over an extended period of time. Our initial offering reflects a selection of the most prolific and successful bands and artists of all time. Go to www.alphaslips.com for the most up-to-date list of theme, artist and band titles available.

Create Your Own Alpha-Slips

Blank slips and a special label maker can be ordered from our Web site for those wishing to custom build their own indexing system.

SETTING UP AND USING ALPHA-SLIPS

1. Remove discs from shelves, creating separate stacks for each letter category using the rules provided. Place corresponding Alpha-Slip on top of each growing stack.
2. As you sort discs from A-Z, separate "Soundtracks," "Various Artists" compilations, and other pre-identified theme and artist categories into their own stacks (placing the corresponding Alpha-Slip on top of each growing stack).
3. If desired, sort each stack alphabetically before proceeding to the next step.
4. Place miscellaneous "A" category CDs (minus "A" theme and artist groups) flush to left wall of top shelf.
5. Add "A" Artist Slips and/or "A" Theme Slips in the proper alphabetically progressive sequence.
6. Repeat for each subsequent letter category.
7. Insert "Rules to Organize Your Music Collection" slip at the beginning of your collection (flush to left wall) for future reference.

Tips and Tricks

- This indexing system is made specifically for shelf-type CD holders of any width, as opposed to individual slot storage systems (which are designed to *store* CDs, not *organize* them). This system also adapts seamlessly if discs are stored in several holders of equal or varying widths.
- Store all Alpha-Slips not used during the initial set-up in a convenient place for future use.
- As slips identify the *beginning of each category*, an "A" slip is not required and therefore not provided. Even larger collections that break separate genres down alphabetically begin with the category name (i.e. "Country"), with "A" titles beginning the section (following the "Country" slip).
- For wider shelves, leave room for approximately five CDs at the right-hand end of each shelf so new CDs can be added without having to move discs from shelf to shelf.
- If a section begins flush with the left wall of a shelf, place a few CDs from the shelf above before the Alpha-Slip to increase the tab's visibility.
- If you desire, tabs can be bent on an angle to enhance visibility. To bend a tab, place the slip in the middle of four CDs, hold upright on a flat surface, and bend the exposed tab in the desired direction (making the crease flush with the CD). Do not bend the tab in both directions as the plastic may weaken and crack.
- When listening to multiple CDs or when discs are in CD wallets, **leave the jewel cases in the shelves**. Place CDs at the beginning of the section or leave the jewel case sticking out an inch. Keeping jewel cases in the shelves prevents having to perpetually shift CDs around and minimizes the chance of losing a case. Remember that finding jewel cases is simple with Alpha-Slips.

*Artist Slip discography information is listed chronologically by year, with each year broken down alphabetically. Biographical information is provided in instances when discography is too large to fit on a slip, or not applicable (i.e. Classical). Although every effort has been made to validate information, Alpha-Slips Inc. does not guarantee the accuracy of discographies and/or biographical information.
